

Does **your** team need to call for **reinforcements**?

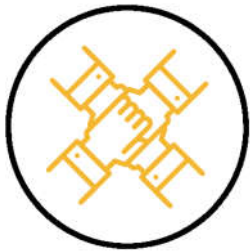

We can help with staff augmentation

i-confidential provides skilled professionals to enhance and supplement existing teams, or lead projects on behalf of our clients. We have a dedicated resourcing function that manages a strong group of information security (IS) and IT security experts, security analysts, project managers, and security leaders.

Why choose i-confidential?

i-confidential is not a recruitment company. We specialise in delivering first-class cyber security and information risk solutions to support some of the UK's most successful companies. Staff augmentation is, however, a fundamental part of the tailored services we provide to support our clients' wide-ranging requirements.

We have built a diverse team of people who understand our objectives and demonstrate our company values. Our network of associates, based UK-wide, allows us to offer quick lead-times for candidates in many instances. We can also offer **i-confidential** employees to supplement teams, offering bespoke working patterns to suit customer needs. Our service is underpinned by some key principles:

- We work to maintain our reputation for quality resourcing, which results in long-term repeat business.
- We recognise the need to be competitive and cost-effective.
- We know flexibility is crucial, and provide blended resource options, balancing skills, experience, and effort.
- We are happy to train and transfer knowledge to our clients' permanent resources.

What our service provides:

- A staffing provision that clients can genuinely rely on. Understanding the information security challenges they face, we adopt a structured, pragmatic approach to help them succeed.
- Resourcing solutions designed to provide stability and continuity.
- Peace of mind, as our extended team works with all levels of management to build trust and deliver successful client outcomes.
- The financial certainty that comes from having an agreed rate card in place, with the adaptability that is sometimes required when specific skills and experience are essential, and perhaps urgent.

Example skills in our resource pool:

Governance, risk and compliance	Identity and access management
Cyber security engineering & design	Network security
